**CHAS. HULTGREN, Crossfield**

P. I. McANALLY, Manager.

We publish the following letters  
that have been sent to Mrs. R. L.  
Boyle from the front:-

In the Field, France,  
27th May, 1915.

Dear Mrs. Boyle,

As you have heard long before  
this, Lieutenant-Colonel Boyle died  
from wounds received whilst nobly  
doing his duty as officer command-  
ing the Tenth battalion. Circum-  
stances have been such that I have  
been unable before this to write to  
you, but as the opportunity now  
offers, I am sure you will be pleased  
to know of the noble manner in  
which he received the wounds from  
which he died.

On the 22nd of April the battalion  
was in billets in the town of Ypres  
and I was with the Colonel in his  
room when an order came in for the  
battalion to stand by; the Colonel  
consequently ordered that the bat-  
talion should form up on the road  
leading to the trenches, and although  
the shells were falling all over the  
place, his face was wreathed in  
smiles, and the last words he used  
to me as he left with the battalion  
for the trenches was a joke to the  
effect that the water carts should be  
used for their intended purpose,  
and for me to be sure and see that  
the shrapnel that was coming over  
did not turn them into sieves. That  
night an order came that he was  
to take a certain wood to recover  
some guns lost by the Territorials.  
Before going forward, he turned  
round to the men and told them  
"We have been aching for a fight,  
we are now going to get it, just  
follow me." He then led the Tenth  
battalion right up to and through  
the wood, and five hundred yards  
the other side of it. In every case  
he was the first one to step into an  
enemy trench, in fact, he led through-  
out. He reached the very advanced  
German trenches safely, and it was  
whilst he was with the men giving  
an order to fix up the trenches to  
defend them against counter attack,  
that he was wounded. Even then,  
he would have lived if he had gone  
immediately to the rear, and so to  
the dressing station, but this he ab-  
solutely refused to do and insisted  
on staying with the men until he  
was sure that nothing else could be  
done to make the trenches safer  
against attack. He then turned to  
the Adjutant and told him that  
there was nothing further he could  
do there, but if the two men who all  
this time had been supporting him  
would help him to the rear, he would  
see that reinforcements were sent  
forward. He never for one moment  
lost his cheerful smile or his optimis-  
m, but was cheerfully urging the  
men to make even greater efforts  
than they had previously done. He  
went to hospital badly wounded in  
both thighs, it is true, but no one  
at that time thought he would die,  
but the long time that he was  
wounded before he would allow him-  
self to be bandaged, and the move-  
ments he was making, caused an  
absolute collapse from which he  
never recovered.

Words will not express the abso-  
lute sense of calamity which has  
struck every officer and man in the  
battalion since we have lost him.  
He was our ideal of a man and a  
leader and I can assure you that  
there was not one of us who did not  
feel to the very limits his loss. He  
had been to us a friend, counselor,  
and a deeply beloved commanding  
officer, and to know that we shall  
no longer be able to receive his

### Breeding Hardly Clovers

Method to be Used in Improving the Hardiness of Plants  
Red clover, being a self-fertile plant, and a variety of clover, can be produced by means of mass-selection and hybridization respectively. When breeding red clover, the qualities particularly should be taken into consideration, viz.: winter-hardiness, quantity of seed, and yield of hay.

It has been proven in cereals which, like red clover, consist of thousands of distinct types, that resistance to disease and hardiness are hereditary characters subjected to the same general laws of heredity as govern the transmission from a motherplant to its progeny, of strictly morphological characters. It is therefore very reasonable to suppose that winter-hardiness in red clover is a hereditary character that can be transmitted from one parent plant to its progeny. If this be the case, it will be a simple matter to produce a variety able to withstand, without being killed to any extent, the most severe Canadian winter. The task is not accomplished by sowing seed from those individuals which survive after a severe winter and wintering the seed. It is the parent crop originally sown, and by saving the seed year after year, a perfectly hardy variety will soon be obtained. This method of improving the hardiness is simply mass-selection effected by nature herself.

Corn cannot resist when Hollowy's Corn Cure is applied to them, because it goes to the root and kills the growth.

### We Think So, Too

"Charles, you're spending too much money this year. Too many dainties, too many clothes, too many taxes, too many—"  
"Well, father, I'll tell you how I look at it. It seems to me that every family ought to be able to support one gentleman."

## MOST PAINFUL SKIN TROUBLE

On Right Side to Hip. Pain Intense. Blisters and Red Swollen Pimples. Could Not Sleep. Cuticura Soap and Ointment Healed.

"1200 City Hall Ave., Montreal, Que.—The trouble began about a month ago. I noticed that I was becoming itchy and unable to keep my arms at my sides. I put some talcum powder in my armpits where the pain was most intense, but while it eased the pain for a little while it affected no sleep. It gradually came down my right side to my hips. At first it was only one continuous red streak, but it transformed itself into blisters and red swollen pimples. The pain was as time as intense that I was forced to hold my right arm in a horizontal position so that it would not rub against me. I could not sleep; I was almost frantic with pain."

"I used two or three different kinds of salves and powders without effect. I had had the trouble about six or seven months before I came across an advertisement of Cuticura Soap and Ointment. The first night I put the Cuticura Soap and Ointment on I felt as if a piece of ice had been put on my side. It was so relieving and soothing I continued using Cuticura Soap and Ointment until I was completely cured." (Signed) A. Simpson.

**Samples Free by Mail**  
For more than a generation Cuticura Soap and Ointment have afforded the most economical treatment for all kinds of skin and scalp that, to wit, itch, burn, scale, and dandruff. Sold by all leading druggists and mail order houses. Sample of each mailed free, with 25-c. Skin Book. Address: Postoffice, Cuticura, Dept. D, Boston, U. S. A."

**Difficult**  
Little Robert—his was Holbrook's trouble. "Mother—I don't know. Why? Little Robert—Well, here it is, it's that after he had finished his day's work he sat down on his chest."

**Productive Patriotism**  
The grain acreage in Canada will be increased from 20 to 30 per cent this year. This is the result of the appeal of England, that Canada do more to help to help feed the empire in the present crisis, Canada is showing its loyalty in very practical manner and living "well up to its waist" of patriotism and production.

### Agricultural Instruction

Dominion Government Entering into Agreements for Provincial Expenditures

Agreements which have been entered into between the Dominion Department of Agriculture and two of the provincial governments, provide for important advances in agricultural instruction under the Agricultural Instruction Act. Ontario and British Columbia are the two provinces with which agreements have been made so far, but agreements with the other provinces are on the way and probably will be completed in the future.

The Ontario agreement provides for an expenditure of \$26,000.00. A good deal of this amount will be spent on the extension work already in progress. The British Columbia program provides for an outlay of \$58,750.00, out of which the usual demonstration work will be carried on and \$15,000 will be used for agricultural instruction in the public and high schools of the province.

## A "Helping Hand" Extended to the Middle Aged Woman

There comes a time in every woman's life when she undergoes an important change. This is a critical period. It is a time when a woman needs her full health and strength for her own sake and should anticipate this.

### Dr. Pierce's Favorite Prescription

has been recommended for over forty years as a tonic for women. It is helpful in the regulation of the circulation of the blood and in regulating the action of the bowels. Nervousness and low spirits disappear. Hemicrania, constipation take their place.

Sold in tablet or fluid form by Medicine Dealers—or 50 cents for sample box

### Are Investigating the Constituents of Soils

University Will Publish Results For Benefit of the Province

The work began last year in investigating the "constituents" of Saskatchewan soils, so as to determine the causes of fertility. Three chemists and one physicist, all graduates of the university, are busy now working the chemical and physical properties in various parts of the province. Some of the samples of soil being tested are those taken from the experimental plots on the university farm, under the management of Prof. Bracken, so as to determine the effect of the amount of nitrogen, potash and phosphates that are present naturally by fertilization. When sufficient data has been collected there will be published a bulletin for giving information to the people of the province. Dr. MacLaurin and Dr. Hogg are in charge of the work—Saskatoon Star.

### COLICKY CHILDREN

Colicky children can be promptly cured by Baby's Own Tablets because these Tablets act directly on the stomach and bowels, and eliminate all impurities. Concerning them, Mrs. James C. Slater, Summerville, N.S., writes: "Baby's Own Tablets and am glad to say I have found them an excellent medicine for colicky children. The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

**Prohibition Causes Increased Savings**  
A report from Petrograd says that the Russian treasury, speaking before the Duma budget committee, declared that owing to the great increase in national savings, due to prohibition, the extraordinary outlay occasioned by the war as yet had not caused any great suffering in Russia.

As proof of this, Mr. Kharitonov said the national savings in December, 1913, which amounted to 700,000,000 rubles (\$250,000,000), had increased to 25,000,000,000 rubles (\$8,333,333,333) in December, 1914. He added that the total savings in 1914 amounted to 25,000,000,000 rubles (\$8,333,333,333), as compared with 8,400,000,000 rubles (\$2,800,000,000) in 1913.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation warranted to destroy all intestinal and intestinal worms without shock or injury to the system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, this is an indication of their powerful action and not of any nauseating property.

"Mary," said her aunt to the little girl from the city, "you ought to go into the barn and see if you can't find some eggs."

"Did you find any?"  
"No, auntie, not one. There's just a lot of chickens out there, standing around doing nothing."

**Dairying Is Popular**  
The eagerness of the farmers of Saskatchewan and Alberta to engage in dairying is evidenced by the success which creamery interests are having in signing up contracts for the purchase of creamery sites. It is arranged to assemble cream at Swift Current, Saskatchewan, reports an extreme, and the creamery sites have gone, and is now assured of regular shipments from many tributary points. A price of 21 cents a pound for butter fat, 100 lbs. of shipment, to effect the increasing popularity of the dairy cow is found in reports of an extreme, and the creamery sites have gone, and is now assured of regular shipments from many tributary points. orders leaves us with a feeling of desolation that will take a long time to efface. His whole ambition was to see that the Tenth battalion was the premier battalion of the division, and there is no doubt that he achieved this, at a cost to himself that everybody who knows him greatly deplores, and the mention of his name brings forth a meed of praise from one and all.

On behalf of the officers and men of this battalion we wish to forward to you our deepest and sincere sympathy for the loss of your husband.

Faithfully yours,

F. ROSS, Capt.  
Quartermaster, 10th Batt. 2nd  
Brigade, 1st Canadian Div.,  
British Expeditionary Force.  
To Mrs. L. D. Boyle,  
Crossfield,  
Alberta, Canada.

14-5, '15,

Mrs. R. L. Boyle,  
Crossfield,  
Alberta.

Madam.—The writer (Private F. Ringrose) is taking the liberty of writing you a few lines concerning your husband the late Lt.-Colonel R. L. Boyle. Would say that I have had the privilege and honor of having been detailed off as his Groom since the Vaucartier days, and with him up to the time of his much lamented, sudden and sad death.

His horse "Jack" is quite all right, and I am still looking after him. He is now being used by Captain Arthurs at present.

For your information would say that the Colonel was wounded on the night of the 22nd and died on Sunday April 24th, at 10 a.m.

He died in the Hospital at Poperinghe, Belgium, and was buried there in the Cemetery same date.

In conclusion Madam, would say how very, very much we all miss him, and it is going to be a very difficult thing to replace him.

Anyhow you have one consolation "He died in harness."

If at all possible after the war is over, his horse "Jack" is coming back to Alberta.

Trusting, Madam, you are fairly well under the circumstances.

I remain,

Yours respectfully,  
Private FRANK RINGROSE,  
(19027).

10th Batt. Steff, 2nd Brigade,  
1st Canadian Division.

#### Notice to Creditors and Claimants.

In the Estate of THOMAS HAMILTON EWING MAGEE, late of Calgary, Alberta, Homestead Inspector, deceased:

NOTICE is hereby given that all persons having any claims against the Estate of Thomas Hamilton Ewing Magee, who died on the 7th March, 1914, at Calgary, Alberta, are required to file with the undersigned Solicitors for the Administrator by the 16th July, 1915, a full statement fully verified of their claims and of any securities held by them, and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or brought to his notice.

DATED this 14th June, 1915.

CLARKE, CARSON & MACLEOD,  
Calgary, Alberta.  
Solicitors for the Administrator.

#### Marriage.

Chas. Hultgren, Agent.

## Crossfield Fair.

The long looked for and much talked of day arrived, the weather conditions being ideal. The stores and most of the houses displayed flags and bunting, which gave the town quite a gay appearance. All kinds of vehicles began to arrive loaded with holiday makers early in the day, and everyone evidently meant to have a good time.

The entries for the different classes were up to the standard, judging commenced by just after nine a.m. We give below a portion of the prize winners.

#### CLYDESDALES.

4 years and over.—R. Richards 1st, J. Laus 2nd.  
3 years and over.—Chris. Amussen 1st, A. D. Brown 2nd.

## The Mystery of the Ravenspurs

By Fred M. White  
Ward, Lock & Co. Limited  
London, Melbourne and Toronto

(Continued)

"Well, I suppose we must part," she said. "Really! It seems years since I spoke to a gentleman and I have only been here for days. I have been ordered absolute rest and quietness for the benefit of my health, and upon my word, I am getting it. Would you take pity upon my loneliness and come to tea?"

Many an older man than Geoffrey had been excused from yielding to such a request. Those eyes were so dark and pleading, and the man was young. Besides, he had an excuse. Had not his uncle Ralph planned this thing and was it not intended to bring about an introduction? Besides, once inside that room, might he not be able to find something that in the future would yield great results.

"I shall be only too pleased," Geoffrey murmured.

"Then come along," Mrs. May said gaily. "If you are fond of a good cup of tea, then I have some of the most perfect in the world."

She led the way into the old-fashioned drawing room, which she had rendered beautiful with flowers. The stiff furniture looked stiff no longer. The hand of an artistic woman had been here and the whole aspect was changed.

"You should have seen it when I came here," Mrs. May smiled as she followed Geoffrey's glance. "It was like a condemned cell. And yet there are things of price here. A little alteration and a few flowers—ah, what a difference flowers make!"

She pointed to her own floral decorations. The room was ablaze with them. And they were all scarlet.

"There was not a single bloom of any other kind to be seen."

"They match my style of beauty," Mrs. May laughed. "I never have any other here."

"You do not care for white flowers?" Geoffrey asked.

"I abhor them. They suggest beautiful maidens cut off by their pre-dead children, the tomb, and all kinds of horrors. I would not have one in the house."

Geoffrey was discreetly silent. Remembering the hundreds of white flowers he himself had seen in this very room not so long ago, this speech staggered him. In a dark kind of way he watched Mrs. May light a spirit lamp under a silver tulle, after which she examined the bloom of the score of fetching the famous tea.

Geoffrey picked up an album and turned the leaves over. He saw that were soldiers, one or two native Indian officials, a great number of society people, professional beauties, and the like—and Mrs. May!

Yes, her fair tender face smiled from the embossed, richly gilt page. The picture had been taken some years ago, but there was no mistaking those pure features. Geoffrey closed the book and walked over to the window. Surprise upon surprise had come upon him lately, but this was staggering.

When Mrs. May returned he was himself again. He could answer her questions gaily and smoothly. It was only when he was on his way home again that he recollected how much information he had gathered and how little he had got in return.

"You must come and see me again," Mrs. May said. "Now, can't you come up some evening and dine with me? Say Thursday. Unless I hear from you to the contrary I shall see you on Thursday at seven. A primitive time, but there's no one in the country."

"You may be certain," Geoffrey said carelessly, "that I shall come if possible. Good-bye, Mrs. May. In ordinary circumstances of the sort you would have called upon me. You will know it is impossible."

Mrs. May pressed Geoffrey's hand with gentle sympathy.

"You have my real regrets," she said. "What a horrible thing it is to think that you are all powerless to help it, Geoffrey!"

Geoffrey found Ralph at the entrance to the castle gate. There was a queer smile on his face, a smile of amused expectation.

"You found her charming?" he asked.

"And clever," said Geoffrey. "I guessed your plot, uncle. She is very clever."

"The cleverest woman in the world, the most wicked of the most unscrupulous. Of course she asked you to dinner, and of course, you will go. Nobody is to know of it."

"Uncle, how did you guess that?" "I'll tell you presently. And I'll tell you many things you will have to say and leave unsaid to—Mrs. May."

"Tell me why Mrs. May's photograph is in her album."

"No, she showed you that!"

"No, I found it out by accident. Is

Marion connected with her?"

"Very closely, indeed. She is Marion's evil enemy, and yet through that pure and innocent girl we are going to strike at the heart of the mystery. Ask me no questions; tonight we will go carefully into the matter."

CHAPTER XIX.

Vera Is Not Pleased

Any stranger looking along the terrace at Ravenspur would have been inclined to envy the lot of those who had their habitation there. It looked so grand, so dignified, so peaceful, brilliant sunshine shone upon the terrace; against the grey stone of the grand old facade, the emerald green of the lawns rose refreshing to the eyes, those old lawns like velvet that only come with the passing of centuries.

People from the rush and fret of cities, excursions to the land and their humdrum life in towns, turned longing eyes to Ravenspur. Angbly who lived in a place like that must be happy.

And some of them looked it. Geoffrey, for instance, as he lounged on the terrace with a cigarette between his fingers, and the white and red and blue with a cap over his eyes and appeared to be given over to a pleasant reverie, and an empty hand in his basket stood by his side.

Ralph Ravenspur lounged up to him. Perhaps he had been waiting for his nephew. At any rate, he always knew where to find him. He sat with the sunshine upon his sightless eyes and smoked his pipe placidly.

"There is nobody about," he asked.

"Nobody," Geoffrey replied. "Do you want to say anything to me?"

Ralph made no reply. Geoffrey watched him curiously.

"You seem to be on the way to a long way off this afternoon?" he said presently. "I can't quite explain the question, but you have been looking those glasses you look a different man. There, now you are yourself again."

Ralph had taken off the glasses for a moment.

"Is the difference very marked?"

"Very marked, indeed. Honestly, I should not have known you."

Ralph gave a sigh, whether of sorrow or satisfaction Geoffrey could not say.

"Time will prove whether the disguise is of any value or not," he said. "I shall tell you about this evening. Are you going?"

"Of course, I am," Mrs. May said. "On the whole, I have deemed it advisable to say nothing to the others. We cannot call upon Mrs. May and they need not know of it."

Ralph nodded. Perhaps he alone knew the real need for secrecy in this matter.

"Quite right," he said. "The less said the better. She wrote to you, didn't she?"

"Yes, yes—I had the letter yesterday."

"And destroyed it, of course?"

"I did not. On the contrary, I see you are angry with me. Well, I will try not to make a similar mistake again."

From the expression of his face Ralph was greatly moved. His face was flushed with anger, he was trembling with passion to his fingertips. There was a queer smile on his face. He laid a kindly hand on Geoffrey's knee.

"My boy," he said earnestly. "There are reasons, weighty reasons why I cannot take you entirely into my confidence. If I did so, you would see the vital necessity of caution even in the most minute matters. You will see that Mrs. May's letter is destroyed at once."

"I will, uncle. The rest of the family believe I am going to Alton tonight."

Ralph nodded. He seemed ready to have forgotten the circumstance. He had fallen into one of those waking reveries that were deep sleep to most men. Geoffrey spoke to him more than once, but failed to gain the slightest attention. Then Ralph rose and moved away like a man in a dream.

Geoffrey lounged about till he had finished his cigarette. He tossed the end away and then proceeded to the house. He would get that letter and destroy it without further delay. But this was easier said than done. High and low Geoffrey searched for it, but all to no purpose.

Had he left it in the dining-room or the library? Possibly in the latter place, seeing that he had written a couple of notes there earlier in the day. It was dim, not so gloomy in the library, and for a moment Geoffrey failed to see that Vera was seated at the table.

He stepped over and touched her caressingly on the cheek. She looked up coldly.

"What are you looking for?" she asked.

"A letter, dear," Geoffrey replied. "But why do you look so strange?"

"Oh, you ask me that! It is a letter you are looking for. Then perhaps it is so obvious that you can't see it."

Geoffrey looked at her in amazement. He had seen her so often, but never like this. He had seen her so often, but never like this. He had seen her so often, but never like this.

"No, I found it out by accident. Is

what you. I have just found a letter lying here addressed to you. As it lay with her name on it, I could not act, but read it. See here!"

A square of thick scented notepaper filled with a dashed black calligraphy shook before Geoffrey's eyes. It was Mrs. May's writing, beyond a doubt. Geoffrey flushed slightly as he took the note.

"Read it," Vera said quietly. "Read it aloud."

Geoffrey did so. It struck him now it had never occurred to him before—that the writer was slightly careless in his manner of phrasing. There was a suggestion of something warmer and more personal than the stereotyped lines implied.

"So this is the Alton where you are going tonight," Vera went on. "Who is the woman? How long have you known her?"

(To Be Continued)

### Adopt Canadian Methods

City of New York Adopts the Model Purchasing Methods of the C. P. R.

Nothing in municipal history expected more interest than the recent adoption by the city of New York of the C. P. R. method of purchasing supplies.

New York orders for municipal purchases total \$22,000 worth of goods and services. The city has been much duplication and waste, some of the departments paying retail prices for the same goods as were purchased wholesale by others.

"Under the C. P. R. system, everything is centralized so as to cut out the possibility of duplication either in the favor of the railway. New York City sent a special investigator round the continent to study methods of purchasing supplies, and he decided that the C. P. R. system was the best for efficiency and saving."

This was naturally the source of much criticism to St. Thomas Shagness, who was himself at one time purchasing agent, and answering letters from other American municipalities. They pour in at the rate of about a hundred a day.

Now the city of New York is known to the C. P. R. and its model purchasing department, with a view to the adopting of similar methods in other cities. It has been calculated that the adoption of C. P. R. methods by American cities has saved Uncle Sam a waste of over a billion dollars.

Western Canada's Rapid Development

This brief period in which Western Canada has attained its present development is vividly illustrated by the "Yorker" of the 11th inst. to the city of Saskatoon.

The last time he was there was on a buffalo shooting expedition, and he recalls trapping and killing animals of the wilds on the very spot which is now the heart of the city.

Within the space of an ordinary memory the buffalo runs have given way to the tracks of the motor car, and some 30,000 people are now living on the very spot where this old-timer used to set his traps.

Are you going to the exposition? No, not if you can avoid it. But your wife bought an entire new outfit to wear at the exposition.

### Farming in the North

Wheat from the Peace River Valley of Good Quality

When the first report of Sir Sanford Fleming, as chief engineer of the Canadian Pacific Railway, was published thirty-eight years ago, it furnished the Canadians of that time with a mass of new but scientific information regarding the areas now included in the province of Alberta.

The surveyor's reports showed that among the various "passes" through the Rocky Mountains that might be used in the construction of a transcontinental railway, there were more available than any of the others; the one used later for the Canadian Pacific main line, the one used quite recently for the National Transcontinental and Canadian Northern lines, and the one through which the Peace River runs from west of the Rockies east toward Lake Athabasca.

Of these three the first was, from a railway engineer's viewpoint, the most difficult, while the Peace River valley was the easiest.

The only objection to the last named was that it was far from the middle pass, known as the Yellow Head.

During this long interval of time it has been matter of common knowledge that there is in the Peace River district, east of the Rocky Mountains, an extensive area of good, arable land, and that the climate is favorable, and that much of the country is well watered by nature. This view of its capabilities for agricultural purposes is corroborated by the recent growth there has arrived in Winnipeg, and that the grain is of good quality.

### Saskatchewan's Wool Clip

How to Pack and Ship Fleeces to Get Benefit of Co-Operative Marketing

Saskatchewan expects to market co-operative, at least 100,000 pounds of wool, from the clip of 1915. Already the department has had printed and sent out a very concise bulletin of instructions to the men who seek to take advantage of the co-operative wool market. The 100,000 pounds of wool will come largely from flocks of Leicester and Down breeds, but where range sheep are included, there will be considerable Merino. The fleeces are required to be dry, free from tags or paint, properly rolled, tied with paper fleece twine and packed in strong, hard, jute sacks. When accumulated and graded, the wool will be shipped from Regina and one or two other points in the province in car lots.

Flock masters have been specially instructed to keep the fleeces from ewes, wethers and kids in separate sacks, and where it becomes necessary to pack three kinds of fleeces in one sack, they are urged to put the fleeces in separate sacks of different kinds. The wool is to be forwarded by freight, by the direct route to the Co-Operative Organization Branch, department of agriculture, Ottawa.

## SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any Dominion Lands Agency (but not Sub-Agency), on certain conditions.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties—Six months' residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a home worth \$500.00.

The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for reduction on certain conditions.

## The Crossfield Chronicle

SUBSCRIPTION PRICE. \$1.00 per year in advance; or \$1.50 if not paid in advance.  
PUBLISHED at the Chronicle office, at Crossfield, Alberta, each Friday.

Business local 10 cents per line first insertion; and 5 cents per line each subsequent insertion.  
Legal advertisements, 12 cents per line for first insertion; and 8 cents each subsequent insertion.

Commercial contract rates upon application.  
ROBERT WHITFIELD,  
PRINTER AND PUBLISHER.

CROSSFIELD, ALTA., JUNE 25, 1915.

Where are those weather pessimists who predicted such a drenching for this year's fair. Perhaps they are now shining their lights under a bushel.

The decorations this year would do credit to any large town, let alone a village like Crossfield. Some of the local tradesmen reaped quite an harvest. Bold out was their cry.

We noticed a great many of our old friends in town to visit our fair.

Found in Crossfield on June 5th, a pair of Eyeglasses. Owner can have same by applying and paying expenses at Chronicle Office.

The much needed extension has been made to our Station platform, it having been extended 48 feet.

Our attention has been called to the Dandelions that are now spreading all around us. Calgary had a Dandelion Day a short time ago, and spades and other garden implements were in full force uprooting this fast spreading nuisance, and by the look of some of our roads, etc., Crossfield will soon be called on to follow in Calgary's wake. Now is the time, before the dandelion gets too great a hold, to take action.

## Red Cross Notes.

There will be a meeting open to all members and friends of the Red Cross Society in the Fire Hall, on Saturday, June 26th, at 4 o'clock in the afternoon. The business to come before the meeting is the appointment of an Executive member of the committee, and the receiving and adopting of the Treasurer's report.

An urgent appeal for more workers and increased funds has been sent out from headquarters, and the meeting will therefore be asked to consider what measures should be adopted in this district in order that Crossfield may take its full share in the magnificent work which is being carried on in every part of the Empire.

It is hoped that the Rev. J. P. Dingle may be able to address the meeting on the aims and work of the Society.

The President extends a most hearty invitation to all those who are interested in Red Cross work, and requests a full attendance of members.

## Bailiff's Sale.

Pursuant to the order of L. F. Clarry, Master in Chambers, in the matter of a certain Chattel Mortgage given by T. E. Driscoll to Mrs. McLean, and to me directed against the goods and chattels mentioned in the said Mortgage, I have seized the following:

50 3-year old Hereford Cows.  
34 1914 Grade Hereford Calves.  
2 Registered Hereford Bulls, 2 and 3 years old.

17 Horses, from 2 to 12 years old.  
1 Percheron Stallion, 15 years old.  
1 Stutz Motor Car, Series 4-E No. 1488.

which I shall expose for sale on MONDAY, JULY 5th, at 1 o'clock on Section 27, Township 29, Range 8, west of 5th Meridian, until sufficient money is realized to pay the amount now due under the said mortgage and the costs in connection with this seizure.

F. M. GRAHAM,  
Sheriff C.J.D.,  
By Stahl & Graham his bailiffs.

Farmers insure your Buildings in the Wawanesa Mutual Fire Insurance Co. A Company of the Farmers and for the Farmers only. Costs only about 35 cents a year for \$100 Insurance.

Chas. Hultgren, Agent.

## The New BRAND Act

requires the re-registration of all the Brands in the Province. All persons who registered Brands before December 31st, 1906, will require to have the same re-registered during the present year. Notices are being sent out, but because of changes of address they may not reach some owners of Brands, and all such are requested to communicate with the Recorder of Brands at Medicine Hat at once, giving a description of their Brands and their present address when full information will be sent them with respect to renewal of the same.

H. A. CRAIG,  
Deputy Minister of Agriculture,  
Province of Alberta.

## KOOTENAY LAKE, B. C.

Offers many opportunities to the man or woman who wants a home or to make an investment in the prize-winning district of British Columbia. These interesting values in the Kootenay Lake district are:—  
Information, as well as maps, beautiful three-coloured magazines, regular paid advertisements, and you mention the name you saw this advertisement, the amount you have to invest, your nationality, one reference, and also send names and address of at least ten friends or relatives who might be interested in buying land in Kootenay Lake district. Our ranchers are making from \$250 to \$1800 per year off from each bearing acre-actual government reports. Land selling at from \$50 to \$200 unimproved; improved tracts from \$600 to \$2500. No irrigation and its expensive upkeep needed here. Plenty of rain; no severe cold weather—like 85 miles long and 5 miles wide—never freezes over; unexcelled fishing, hunting and boating; no crop failures in these lands; no severe storms such as hail, wind, or lightning; no rainy season—its just ideal from a climatic as well as financial standpoint.

Names of reliable real estate firms furnished; where to buy the best land; what to plant and when to plant it and how to succeed in our district, as well as other information furnished free. Answer today as there is only a limited number of maps, magazines and our diagrams. Enclose 10c silver postage, etc.

## KOOTENAY LAKE INFORMATION BUREAU, Lock Box 1172 Nelson B.C.
